Natural Solutions for the Liver

WITH JOHN ANDREWS

This seminar continues with John's acclaimed and well-presentations, illustrated, interactive approach suitable for all practitioners, students & interested parties

continues with John's acclaimed and well-presentations, illustrated, interactive approach suitable for all practitioners, students & interested parties

The liver is central to a profound amount of functions in the body and impacts upon the digestive system, immune, endocrine, metabolic, brain and emotional health for everyone. This seminar, by seven times international award-winning iridology & natural health author, practitioner & lecturer John Andrews, will highlight a multitude of new research concerning the liver, digestive health and all the above systems, how they integrate and when we can support these pathways via practical natural solutions involving mind-body approaches, nutrition, homotoxicology, herbal medicine, homeopathy, modern iridology research, visual signs, blood groups, appropriate clinical signs, liver chronobiology, PNEI & foods.

Seminar Registration Information

The Seminar fee is £50 in when paid in advance (£60 on the door)
