

CNM's Iridology Diploma Course

About this course

CNM's professional course in Iridology covers all aspects of using Iridology proficiently as an assessment tool in clinical practice. This course also incorporates naturopathic techniques and is ideal for the practitioner who is looking to broaden their skillset by utilising a range of disciplines.

Key features:

- Theory, history and practice of Iridology, iris topography and the iris map
- Signs and markings in the iris, pupil and sclera, and their implications
- Recognition of pathological portraits
- Iridology and naturopathic therapies in practice
- Advanced constitutional Iridology, subtypes and syndromes
- Energetic and behavioural considerations
- Ethical aspects of Iridology
- Clinical practice and contraindications, clinic and case management
- Reporting and communicating with other medical professionals
- Dynamics of one-to-one consultation: communication with and empowering the client
- Photography and equipment

Study programme

This course consists of 2 parts:

1. Certificate course (3 weekends)
